ISH 2023: The leading platform for the HVAC sector offering solutions for a sustainable future

In March, the entire HVAC sector will finally meet up again in person at the ISH fair in Frankfurt am Main. Look forward to face-to-face discussions with manufacturers, experts and colleagues at the world's leading trade fair for HVAC and water. Discover groundbreaking ideas and solutions for your day-to-day activities. Make ISH your source of inspiration for the latest trends – and become a sustainable future pioneer.

Visit ISH from 13–17 March 2023 live in Frankfurt am Main – it will be worth it!

ISH Energy top themes

Here is where you can feel the dynamism and innovative spirit of the entire sector. Experience at first hand the solutions and services that the industry is using to respond to current challenges: For instance, what will future self-sufficient heat supply systems look like? And how can the heat and power sectors be managed more effectively?

ISH Energy 2023 will focus on:

- Groundbreaking solutions for achieving the Paris Climate Agreement goals
- Energy management systems that intelligently link the heating and mobility sectors
- Efficient technologies and renewable energy sources in the heating market
- Energy storage
- The growing importance of hydrogen as an energy source

Experience
innovation at
first hand.

Indoor Air Quality

This top theme focuses on **air as an essential element in our lives**. It presents fresh ideas around ensuring high indoor air quality, which in turn improves well-being and productivity.

Energy Efficiency & Sustainability

The Energy Efficiency & Sustainability theme covers the latest trends and solutions for the **integration of renewable energies through smart buildings in smart cities as well as electromobility and building automation: pure efficiency!**

Building New Energy presents the housing and building industry as drivers of the energy revolution with innovative products and services that are making a decisive contribution to combating climate change.

Ventilation with Heat Recovery showcases solutions that will contribute to a much more efficient use of heating energy in the future.

Solutions for Heat Transition and Climate Protection

This top theme focuses on technical solutions and sustainable concepts around ensuring a secure energy supply, transforming the heating sector and increasing electrification.

REPowering EU: Technical solutions for the building sector

Decarbonisation in the Heating Sector:

Heat pumps as an important building block for transformation in the heating sector

H2-Ready: Climate-neutral heating with hydrogen

Intelligent Energy Management:

Sector coupling in buildings for climate protection

ISH Water top themes

In addition to design aspects, the ISH Water 2023 segment also focuses on the issue of sustainability. The Bathroom Experience and Installation Technology areas offer a wealth of inspiration around the latest trends, designs and customised comfort solutions in bathroom design that meet cross-generational needs.

The **Sustainable Bathroom** and **Resource Water** top themes offer manufacturers a platform to showcase efficient and sustainable products that contribute to even greater comfort, more efficient use of resources and increased climate protection.
