# The ISH halls at a glance

# ISH

17. – 21. 3. 2025  
Frankfurt am Main

2.0

## Bathrooms

### Private bathrooms

Fittings for everyday bathrooms, whether at home or in hotels

FOR

## Bathrooms

### Private bathrooms

Fittings for everyday bathrooms, whether at home or in hotels

3.0

## Bathrooms

### Bathroom installation

Modern installation systems and technologies for bathrooms

### (Semi-) public & industrial bathrooms

Sanitaryware solutions for (semi-) public buildings such as office blocks, airports, shopping centres, schools, sports and recreation facilities, hotels and production plants

### Care sector bathrooms

Sanitaryware solutions for individual customer requirements in healthcare, including hospitals and care facilities

### Private bathrooms

Fittings for everyday bathrooms, whether at home or in hotels

3.1

## Bathrooms

### Private bathrooms

Fittings for everyday bathrooms, whether at home or in hotels

### SPAs, pools & wellness

Solutions for both public and private pools, private wellness facilities and hotel spas

4.0

## Water-bearing systems

### Drinking water circuit

Hygienic drinking water supplies for buildings, intelligent water management systems and efficient water treatment

### Drainage for buildings

Modern drainage and sewage pipes and systems for buildings

4.1

## Bathrooms

### Private bathrooms

Fittings for everyday bathrooms, whether at home or in hotels

Sanitary & HVAC production

Components for sanitaryware, OEM, services

4.2

## Bathrooms

### Private bathrooms

Fittings for everyday bathrooms, whether at home or in hotels

Sanitary & HVAC production

Components for sanitaryware, OEM, services

## Water-bearing systems

### Drinking water circuit

Hygienic drinking water supplies for buildings, intelligent water management systems and efficient water treatment

5.0

## Bathrooms

### Private bathrooms

Fittings for everyday bathrooms, whether at home or in hotels

5.1

## Bathrooms

### Private bathrooms

Fittings for everyday bathrooms, whether at home or in hotels

6.0

## Water-bearing systems

### Heating circuit: Surface heating systems

Efficient, comfortable and sustainable space heating using surface heating systems

### Drinking water circuit

Hygienic drinking water supplies for buildings, intelligent water management systems and efficient water treatment

### Drainage for buildings

Modern drainage and sewage pipes and systems for buildings

### Green roofs & façades

Greening roofs and façades using solutions that also ensure suitably efficient and sustainable irrigation and drainage

### Utilisation of process & rainwater

Special systems to collect, store and distribute rainwater

Sanitary & HVAC production

Raw materials

6.1

## Installation

### Tools & fastening, operating, storage & transport, industrial pre-assembly

Innovative technologies, modern tools, efficient warehousing and transport concepts and the latest developments in industrial pre-assembly

8.0

## Indoor Air

### (Non-) residential, data centres, educational & healthcare, industrial processes and retail buildings

Innovative air conditioning and climate control units and equipment to improve indoor air quality for better comfort and wellbeing

Sanitary & HVAC production

Components for refrigeration, ventilation & air-conditioning units, OEM, services

Software

### Planning for new and existing buildings, building management, office & business

Software solutions for planning, increasing efficiency, digitalising and optimising business processes

9.0

## Water-bearing systems

### Heating circuit: heat distribution

Efficient systems and components for heat distribution

Sanitary & HVAC production

Components for heat generation, OEM, services

9.1

## Water-bearing systems

### Heating circuit: heat distribution

Efficient systems and components for heat distribution

## Heat generation

### Local & district heating

Solutions for heating network infrastructure and transferring heat into the buildings

Sanitary & HVAC production

Components for heat generation, OEM, services

10.1

## Heat generation

### Electricity-based heating systems

The latest heat pump systems combined with photovoltaics and home storage systems

## Indoor Air

### (Non-) residential, data centres, educational & healthcare, industrial processes and retail buildings

Innovative air conditioning and climate control units and equipment to improve indoor air quality for better comfort and wellbeing

Sanitary & HVAC production

Components for refrigeration, ventilation & air-conditioning units

Components for heat generation, building automation, OEM, services

11.0

## Heat generation

### Biomass heating systems

Modern, sustainable wood-fired heating systems combined with solar thermal and efficient flue systems

### Gas & liquid-based heating systems

Gas & liquid-based heating systems based on modern energy sources such as e-fuels, biomethane and hydrogen

Sanitary & HVAC production

Components for heat generation, OEM, services

11.1

## Intelligent building management

### Building automation, energy management, smart home & home energy management, maintenance

Equipment and systems to create a network inside a building for greater energy efficiency, interior comfort and safety

Sanitary & HVAC production

Components for refrigeration, ventilation & air-conditioning units, OEM, services

Components for heat generation

Components for building automation

12.0

## Heat generation

### Electricity-based heating systems

The latest heat pump systems combined with photovoltaics and home storage systems

### Gas & liquid-based heating systems

Gas & liquid-based heating systems based on modern energy sources such as e-fuels, biomethane and hydrogen

12.1

## Heat generation

### Electricity-based heating systems

The latest heat pump systems combined with photovoltaics and home storage systems

### Gas & liquid-based heating systems

Gas & liquid-based heating systems based on modern energy sources such as e-fuels, biomethane and hydrogen
