Details on stand dividing wall

250 cm height

Please note that we will set up stand walls ONLY if you explicitly wish for it and order it in the shop for exhibitor services. If your stand neighbor wishes to set up stand walls they will also be set up.

Dimensions	Wall elements including cable duct H: 250 cm, W:100/50 cm, D: 4 cm Total height including adjustable feet, top edge at approx. 260 cm.
Structure Characteristics	Each wall element is composed of a honeycomb structure sandwiched between chipboard panels, film faced and painted white. The upper edge is provided with a cable duct. Each element has 2 adjustable feet to compensate uneven floors. Other colors are available at an extra charge on papered walls only. Walls must not be damaged by nails, screws, painting, stickers or similar. Any films affixed by users must be removed without residues after the trade fair. The wall elements are available with a width of 100 and 50 cm. Walls can be connected and subdivided at a 90 degree angle. Walls are free-standing up to 5 m. For lengths of more than 5 m, your stand must be equipped with 100 cm deep supporting walls placed at a 90 degree angle. The maximum load per wall element is 20 kg. For loads of more than 30 kg spread over several wall elements please consult your technical advisor. Skirting boards are advisable to cover the gap (approx. 10 cm) caused by the adjustable feet.
Wallpapering and painting	Please note that walls are in technically flawless condition, are finished with a standard white base coating, and are freshly cleaned before the event. For a superior quality or customized finish, we recommend to have the walls wallpapered and painted by us. If you wish your walls to be painted in a color different from white, they must be wallpapered first to protect the material. You can carry out this work with your own wallpaper and paint if you are approved to do this, or commission us to do so: For orders please contact us online at www.serviceshop.messefrankfurt.com.
